

Technology, Quality, Environment

Norms and standards

Biosteel A/S manufactures, collects and supplies to its customers non-dismantling preinsulated pipe systems which meet the following standards EN 253:2009+A2

District heating pipes - Preinsulated bonded pipe systems for directly buried hot water networks - Pipe assembly of steel service pipe, polyurethane thermal insulation and outer casing of polyethylene.

SOCIAL ACCOUNTABILITY POLICY

Biosteel A/S strives to act in a socially responsible way in developing long-term, transparent and sustainable business. To achieve these goals the company is guided by the Global Compact principles covering human rights, labor, environmental protection, the fight against corruption, and is committed to:

HUMAN RIGHTS

- Respect man, his rights and freedom, as stipulated in the Universal Declaration of Human Rights.
- Protecting employees' personal data and privacy.
- Develop and promote the experience, knowledge sharing and communication processes between different generations of employees.
- Employee performance seen in the context of their professional skills behavioral synthesis, without discrimination by sex, race and age.
- Language, actions or solutions proposed to discriminate against any person or social group, regardless of their nationality, race, sex, language, origin, social status, religious belief, political opinion, and to take legal measures to prevent noticed discrimination.

LABOR FORCE

- To provide adequate, safe and healthy working conditions for our employees.
- In accordance with occupational health and safety standard OHSAS 18001, continuously evaluate the workplace and risks, if any, to the safety and health of the employees, in order to implement accident prevention measures.
- Working relationships based on respect and honesty, to prevent any forced or child labor.
- All working relationships to ensure equal opportunities and to prevent discrimination, either directly or indirectly.
- To promote social dialogue between employer and employee representatives.
- Do not follow unfair or discriminatory working practices exercised by their partners, suppliers and subcontractors.

ENVIRONMENTAL PROTECTION

- We support and implement international environmental standard ISO 14001 ideas;
- We are taking initiatives to implement pollution prevention, energy resource saving, waste sorting and other environmental protection measures;
- We strive to use environmentally friendly technologies;
- Encourage employee environmental awareness.

THE FIGHT AGAINST CORRUPTION

- We fight all forms of corruption, including bribery.
