

Heat - Shrinkable Joints

A set of MTO1 joints contains:

- a non-cross-linked heat-shrinkable sleeve with mastic
- cross-linked heat-shrinkable collars with hot-melt visco-elastic sealing
- 2 pieces
- ventilation plugs – 2 pieces

MTO1 joints are wrapped in white LDPE foil and should be stored and transported in upright position to avoid ovalization. Maximum temperature during storage and transport should not exceed 40°C.

Additional accessories: during assembly of the joints, components of polyurethane foam (PUR) are to be used. When ordering please specify if the joints are to be delivered together with PUR foam.
